## European Crypto Bank extends its ICO until July 15, 2018

European Crypto Bank has made the decision to extend its ICO to the 15 th of July and we believe we can optimise it for best results.

The public sale will continue in the meantime with a 35% ECB token discount over 2 BTC or 10 ETH. We would encourage anyone who has not already participated to do so now at :

**<https://www.europeancryptobank.io/ecb-special-offer>**

Our decision to extend the ICO is based on several factors, including market conditions and stakeholder feedback.

Indeed we see this extension as an opportunity to start selling our product to our customers, demonstrating that ECB is an actual business offering a powerful solution to those who want to invest on cryptocurrencies and to declare their profits to their local tax administrations.

We are working hard to start our exchange as soon as possible while we will provide our Archos ECB Device Wallet for our customers with more security for all traders.

We also work on new big partnerships for the best future of ECB.

We are increasing our Community and are ready to start our Tax Services in France, UK, Italy, Luxembourg and very soon in the German Market.

Once again, we remain supremely confident in the future of our vision and would encourage anyone to participate in our ongoing public sale, which offers a discount of 35% to our investors with our special offer.
